

No One Cares About Your Content... Yet.

It's time to take a fresh look at content through
the eyes of the reader.

Aren't you just
being facetious?

No, seriously. No one cares. Actively.

90% want
brands
to
share

10% think
they do
it well

31% believed what advertisers
and marketers said about
their products/services
(that's it)

47% of CIOs said that poorly
targeted, irrelevant
communications was their
#1 frustration with vendor
content

It's just
Millennials on
mobile, right?

The mobile revolution is just now happening.

You don't have much time to make your value pitch.

“The probability of leaving is very high during these first few seconds ... People know that most Web pages are useless, and they behave accordingly to avoid wasting more time than absolutely necessary on bad pages. ... To gain several minutes of user attention, **you must clearly communicate your value proposition within 10 seconds.**”

Your pitch isn't getting read fully, anyway.

“On an average visit, users read half the information only on those pages with 111 words or less. In the full dataset, the average page view contained 593 words. So, on average, users will have time to read 28% of the words if they devote all of their time to reading. More realistically, **users will read about 20% of the text on the average page.**”

And people are judging you...
...before they even start reading.

Your first impression is made in
⌚ **50 Milliseconds.**

Not #authenticity. Not Authenticity™.

People Being Marketed To

● People ● Not People

How do you choose your friends?

You have similar goals, not data points.

Content engagement is like

Personality

Fearless Flyer®

“A cross between Consumer Reports and Mad Magazine, The Fearless Flyer is kind of like a newsletter, a catalog and a bit of a comic book all at the same time.”

The customer is always the star of the story.

Progressively Quirky Branding

Personality started with a funny staff page, and progressed after positive feedback.

Leads per day went from 10-15 to 100+ per day—they attribute that leap to **personality** injection. Word-of-mouth referrals make up 60% of new leads (2013).
